The Abbott Way
We're on it!
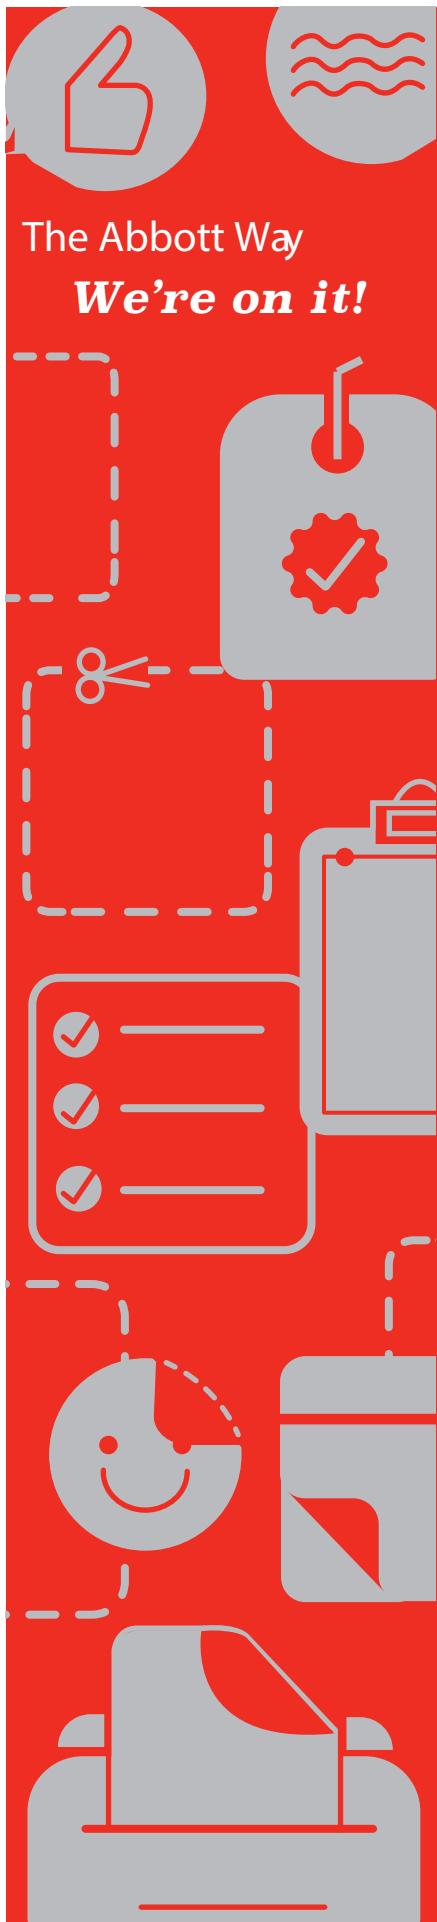

The Ascent of Abbott Label

Experience in rapid turn around and reliability, strong values to deliver on promises and determination are at the core of Abbott Label, writes Danielle Jerschefske

A bbott Label has grown into one of the largest wholesale label manufacturers in the US. Headquartered in Dallas, Texas, it has satellite production locations in Atlanta, Georgia;Santa Fe Springs, California; and Itasca, Illinois.

John Abbott, Abbott Label founder and president explains, "We have chosen our locations because that's where our key suppliers have easy distribution. Every one of our plants can get material the same day or the next day, and that's part of the service. We firmly believe that you can't service people unless you have the equipment there."

The converter produces for resellers only, stocking a vast array of materials including thermal transfer, direct thermal, and laser stocks for applications such as warehousing, shipping and receiving labels. Abbott Label produces a lot of work for the packaging industry, for example box suppliers interested in bidding on label business that provides potential customers single source service.

"Labels become a part of what some of our customer base is trying to sell,"says Abbott. "These guys need someone to support them in manufacturing, and we do."

Abbott Label prides itself on delivering orders the same or next day. It has flexographic printing equipment in 10 inch and 17 inch widths with four to eight color stations for producing commodity labels as well as food, beverage and industrial prime labels. It can also produce integrated label forms, some flexible packaging and short run full color digitally printed labels.

Each facility has at least one stand-alone die-cutting press to reduce off-line finishing. There is redundancy built into the press and finishing assets used at each of the plant locations to ensure speedy turnaround times as expected by Abbott Label customers.

The converter has more than 10,000 different solid dies warehoused plus a growing number of magnetic cylinders and dies. Die usage is tracked between the plants and when a piece is borrowed more than twice, then the facility purchases its own die to have on hand.

Abbott continues, "Thirty percent of our work is with other label manufacturers who don't have the same capabilities as we have or the ability to turn work around like we can."

> " Thirty percent of our work is with other label manufacturers who don't have the same capabilities as we have or the ability to turn work around like we can "

We have a dedicated manufacturing plant located in Shelbyville, TN that manufacture RFID labels and tags plus encoding when needed.

Proof examples:

Want to know more about RFID, GS1 Barcodes/UPC Product and Case Labeling?

UPC/GS1 product barcoding can be confusing and now RFID has been added to the mix as EPC. RFID is used in many different types of item marking. The largest and most common type is retail product marking using UHF Rain RFID. RFID is used in many different types of item marking.

The largest and most common type is retail product marking using UHF Rain RFID. There are billions of products that are labeled for retail sale in the world market and most require identification for retailers to accept them.

Even Amazon is now forcing their sellers (2025) to have UPC marking on all products that are marketed through Amazon.com.

3
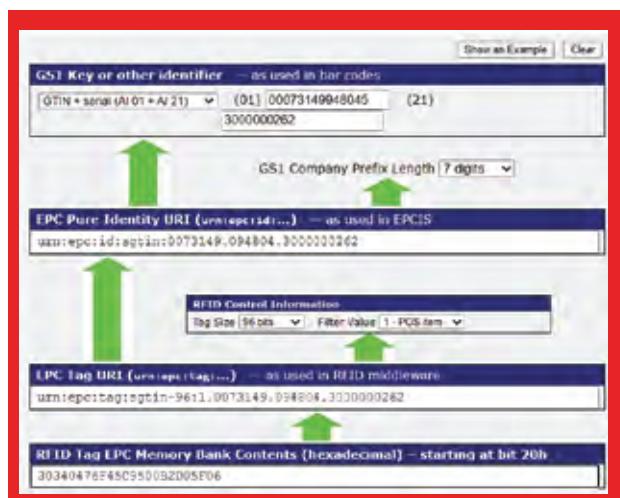

96-bit EPC Composition Retail Item Example		Item Level EPC,	UPC = 073149948045

EPC Hexadecimal value = 30340476F45C9500B2D05F06

Binary Value (96 bits) = 110000001101000000001000111011011110100010111001001010100000000010110010110100000101111100000110

An RFID Label or Tag usually contains a barcode plus an inlay that is made of a computer chip and an antenna. The RFID inlays that Walmart is now requiring are encodeed as noted above. They are activated and respond when scanned by an RFID scanner.

Enter the GTIN (00+UPC) and a serial number to encode an EPC or Enter an EPC (bottom) to decode it to an GTIN and serial number.

GSI has tools to help:

https://www.gs1.org/service/epc-encoderdecoder

GS1: Worldwide Provider of UPC Barcodes, Brussels, Belgium.
GTIN: Global Trade Identifier Number. A unique combination of numbers assigned to retail products as the UPC/EPC.
EPC: Electronic Product Code. The UPC/GTIN plus consecutive number assigned to retail products. Walamrt is a leader in implementing these in many of their product lines.

GTIN-12 & GTIN-14: Cartoon Barcodes for GTIN products (below left).
IFT-14: Interleaved 2 of 5 GTIN-14 Case Barcode (below right.)

Abbott Label RFID Tags

Abbott Label is opening a new RFID label converting facility in Shelbyville, TN. We will produce RFID labels for use across various industries and applications.

WHAT ARE RFID LABELS?

RFID stands for Radio Frequency Identification and contain a tiny computer chip and a small antenna. They also use radio waves to communicate information wirelessly to reader devices.

KEY COMPONENTS

Chip: Stores data about the asset, tag, and operational information
Antenna: Allows communication with RFID readers
Inlay: Microchip connected to an antenna on a flexible substrate
Carrier: Contains the inlay in a format suitable for the application

INDUSTRIES AND APPLICATIONS

Manufacturing
Transportation & Logistics
Healthcare

Retail (inventory tracking)
Libraries (book tracking)
Warehouses (shipment tracking)

ADVANTAGES OF RFID LABELS

- Wireless data transmission without line-of-sight
- Real-time, dynamic information updates
- Readable through materials and from a distance
- Ideal for inventory management and asset trackin

ABBOTT LABEL ADVANTAGE

- New, state-of-the-art facility in Shelbyville, TN
- Customizable solutions for various applications
- Expertise in RFID technology and implementation

CHOOSING THE RIGHT RFID LABEL

1. Label and inlay size
2. Surface considerations
3. Mounting method and orientation
4. Environmental factors
5. Radio frequency considerations
6. Memory and microchip requirements
7. Hardware compatibility

CONTACT US TODAY

RFID technology is experiencing rapid growth and adoption. Abbott Label is positioned to meet the increasing demand for RFID solutions. Additionally, our team can provide tailored RFID label solutions for diverse customer needs

RFID Label
Quotation Questionnaire

This questionnaire is designed to gather essential information for quoting new RFID label projects. Please use these questions when interacting with clients to ensure we collect all necessary details for an accurate quote. If the client has an example of a similar RFID label they've used before, please requeST that they provide it as a reference.

1. What is the required size of the label?

   _____

2. What material and adhesive type would you like for this label? (If unsure, please describe the end-use application and expectations for the label)

   _____

   _____

   _____

3. How many colors would you like printed on the face of the label?

   _____

4. Will the label be running through a secondary printer? If yes, please provide the printer's make and model.

   _____

   _____

5. What chip/inlay type is required?

   _____

6. What is the desired position of the chip in the label?

   _____

7. Please provide finishing information:
   - Core size: _____
   - Number of labels per roll: _____

8. How many labels will be ordered: _____

9. Do you have an example of a similar RFID label you've used before? If yes, could you provide it as a reference?

   _____

Additional Notes: _____

Building Abbott Label

Throughout the 1980s and 1990s Mr. Abbott worked at Metro Label, his father Jerry Abbott's label manufacturing company, establishing a thriving, multi-site label manufacturing network. The future looked bright when Metro Label sold to an investment group in 1998 with a high double digit EBITDA.

Nonetheless, circumstances commanded Abbott to launch his own business in 2001 with the personal and professional values instilled in him by his father. He says, "My dad has been a pioneer in the industry, such a strong mentor and role model for so many of his employees and vendors. He places value on morals and ethics, which creates a powerful working culture. We've rolled those values into Abbott Label."

To kick start the company, Abbott ordered a 17 inch 6-color Mark Andy 2200 without having a building to plug the press into. It was a tough market for warehousing in Dallas at the time, and when Abbott essentially found a building, there wasn't enough power. He explains with a bright smile, "We had an extension cord running from the front office to operate the business, but really the press sat still in the shop for six weeks."

Determination won, and in the first month of operation, sales rapidly increased. Next, a loyal pressman from Metro Label moved to Abbott Label, balancing the operations and sales sides of the burgeoning business. Eventually, the operator moved to California to open an additional production facility there in 2003. By 2004 Metro Label ceased operations, and Abbott Label was presented with the opportunity to purchase dies and presses that guided the business through exponential growth in the early years.

Strategic investments

Abbott Label moved into a new 100,000sq ft (9,295sqm) headquarters in Dallas in October 2013, only months after opening its Itasca facility in Illinois where it currently has 20 people on staff. The new Dallas plant incorporated new Kodak Flexcel NX digital plate making equipment and the HP Indigo WS6900 digital printing press plus a Delta ModTech finishing system.

The digital press is running 2-2.5 shifts daily during the week and picking up business regularly. The converter is now producing more full color work and continues to see requests coming in for work that's suited for its digital presses. Digital print represents about 31% of custom jobs received.

With roots rich in success and overcoming challenges, Abbott is determined to grow his business to be a one stop shop for customers across the US with representation in all of the major cities. The next step is to look at geographic expansion into the northeast.

Abbott concludes, "One of the things that our big customers like is that we are able to service them across the country and the reliability is there. We've proven that we're able to deliver on their needs, and we will continue investing to improve our services."

> " Every one of our plants can get material the same day or the next day, and that's part of the service. We firmly believe that you can't service people unless you have the equipment there "

Digital Printing
HP Indigo 6k Series

- Run multiple SKU's together
- Seasonal marketing
- Deliver Just-In-Time

- Variable data
- Sequential numbering
- Double bumps of white

extended gamut printing

Adding Violet, Orange and Green to CMYK extends the color gamut which will increase matching spot colors.

Guidelines for
Supplying Artwork

Accepted Programs/Files

Adobe Illustrator (AI, EPS, PDF) - Version 26.0 ,3 or earlier. AI file is preferred. PDF's must be saved as the same quality as the AI file)
Adobe Photoshop (PSD) - Version 23.2.2 or earlier.

Font Information

Convert text to paths, curves or outlines (text that becomes an object and can no longer be edited as text.) If this is not possible, send fonts with the other supporting files needed (high-res images, etc.) for job to be printed.

White Print/Varnish/ Deadened Adhesive

If the job requires White underprint, Spot Varnish, or Deadened Adhesive then the file needs to be setup accordingly. The file should clearly show where White, Varnish, or Deadened Adhesive needs to be. We can provide a template to assist in setting up White print properly.

Include all original files (EPS, AI, PSD, etc.). Image files need to be 300 dpi resolution minimum at 100%. Please send the pSD Photoshop file along with a flattened Tiff or EPS file when able. If possible, please refrain from setting text in photoshop.

Introducing our revolutionary Linerless Labels – a game-changer in labeling technology! Say goodbye to waste and hello to efficiency with our innovative adhesive-backed labels that eliminate the need for traditional liner materials. Experience a seamless application process, saving you time and resources while reducing environmental impact.

Our linerless labels boast a sleek design and versatile application, perfect for a variety of industries. From food packaging to logistics, our labels adhere flawlessly without the hassle of disposing of liners, making your workflow smoother and more eco-friendly. Embrace a sustainable future without compromising on quality. Upgrade your labeling experience with our cutting-edge Linerless Labels – efficiency, versatility, and sustainability all in one product!

5 Reasons to go Linerless

Inkjet vs Laser Printing

- Sprays ink directly on material
- More versatile printing
- Prints best on Inkjet coated
- material
- Printers are cheaper but upkeep is more expesnsive

- Uses toner cartridges instead of ink
- Higher speed printing
- Prints on most materials
- More upfront costs but less upkeep costs than Inkjet

Maximize your inventory efficiency and savings with Abbott Label, Inc.'s Run and Hold Program

This exclusive opportunity allows you to enjoy bulk purchase discounts without the hassle of managing large inventories. **Here's how it works:**

Place Your Order: Secure your desired quantity at a discounted bulk rate.

Customized Release: We produce your entire order upfront and store it safely in our warehouse. You have the flexibility to request shipments according to your needs over a six-month period.

Pay As You Go: You're only billed for the product as it's released, along with any associated shipping costs, keeping your cash flow smooth.

End of Term Options: At the end of the six months, choose to receive the remaining stock, extend storage with a small fee, or discuss other available options.
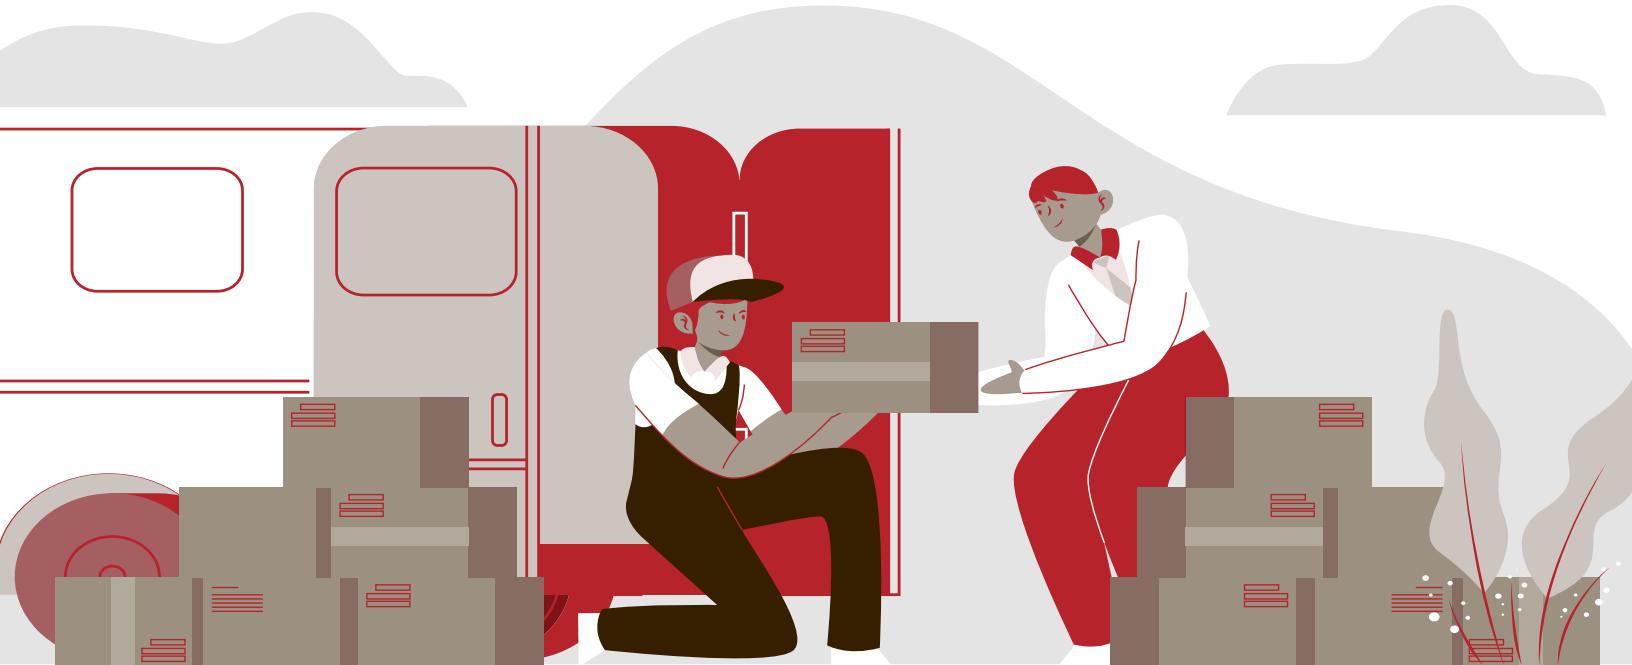

This program is ideal for customers who prefer **less than 100%** of their order to be shipped immediately. Each order under this arrangement is considered part of the **Run and Hold Program**, ensuring you get the benefits of planned releases and billing.

Should any product remain after the initial six months, we offer flexible solutions: immediate shipment of the remaining product to a location of your choice, a modest 10% storage fee for up to three additional months, or, if necessary, arrangements for the final disposition of any unreleased product.

Join the Abbott Label Run and Hold Program today and enjoy the perfect balance of **cost efficiency, storage convenience, and inventory management flexibility**.

Variable Data Imaging

Maximize Savings and Efficiency with Abbott Label's VDI Solutions.

Don't let in-house variable data imaging (VDI) label printing drain your resources. Partner with Abbott Label and experience the benefits of our expert VDI label printing services:

• Cut costs by eliminating the need for expensive equipment and specialized staff.
• Handle any job size with our Domino K600 hybrid print system, HP Indigo 6K series press, and Domino N610i.
• Enjoy flexibility with a wide range of label materials, sizes, and designs.
• Ensure consistent, high-quality labels every time.
• Focus on your core business while we handle your VDI label printing needs

Abbott Label invests in the latest technology to provide you with superior VDI label printing solutions. Trust our experienced team to deliver cost savings, flexibility, and exceptional quality for all your label needs.
